Canada still kills

Harpseals.org

PETITION TO END THE SLAUGHTER OF HARP SEALS IN CANADA

To: Stephen Harper, Prime Minister and Gail Shea, Minister of Fisheries and Oceans. We the undersigned are appalled at the continued slaughter of harp seals in Canada. This annual massacre, the largest slaughter of marine mammals on the planet, is both cruel and ecologically irresponsible, particularly in light of the lack of sea ice available for whelping due to global warming. We demand that it end immediately. We will boycott Canadian seafood and will not vacation in Canada until the government of Canada institutes a permanent and total ban on the commercial seal kill in Canada.
